PhuvadolWorabutr@gmail.com | 097-307-3582

Data Engineer with hands-on experience in large-scale (thousands of MB - TB) ETL processes using SQL and shell scripting. Skilled in data ingestion, automation, and pipeline orchestration across on-premise and cloud platforms. Proficient in managing data pipelines with Apache Airflow and Docker on Google Cloud Platform, including workflow design and infrastructure setup. Also experienced in building ETL processes on Microsoft Azure with C#, with a solid foundation in Machine Learning demonstrated through the Gold Price Prediction Project.

Work Experience

Data Engineer | Product & Development

Aug. 2025 - Nov. 2025

Creden Asia Co., Ltd.

- Developed and optimized data ingestion processes from multiple data sources, including government APIs, websites, and internal systems.
- Performed data cleansing and transformation to ensure data quality and readiness for business use.
- Designed and implemented end-to-end ETL systems for extracting, transforming, and loading data into MongoDB and PostgreSQL.
- Built and maintained data pipelines with comprehensive logging for traceability and automated email notification systems for monitoring and alerts.
- Designed and documented scalable and maintainable data pipelines and workflows.

Data Engineer | Data Warehouse Team

Jun. 2024 - Jul. 2025

PP&P Advance Co., Ltd. | Outsource Mimo Tech Co., Ltd. (Subsidiary of AIS)

- Developed ETL processes on On-Premise systems to prepare data for teams to use in analytics and to support campaign operations.
- Ingested data from both Data Lake and Data Warehouse into a Data Mart, and managed bi-directional data transfers between cloud and on-premise environments.
- Analyzed, resolved, and improved processes based on system issues (Issue Analysis and Resolution).
- Developed data monitoring scripts and implemented an automated email notification system.
- Cleansed unnecessary data from the database to enhance processing performance and overall system efficiency.
- Conducted a Proof of Concept (POC) for migrating processes from On-Premise to On-Cloud (Azure Databricks) using PySpark to assess the cost and feasibility of migration.

Internship

Assistant Data Analytics Professional | Channel Service

Nov. 2023 - Mar. 2024

A-HOST Co., Ltd.

- Create a script for the ETL process and deploy it to Azure Functions to load data into Azure Blob Storage using C#.
- Create a script to categorize JSON files fetched from an API into categories for easy file retrieval, using Python.
- Check the business logic in the Macro script and compile the information into a document to serve as a guide for pipeline implementation.
- System Integration Testing (SIT) Reconcile ensures the accuracy of the information to be 100%.

Project

Gold Price Prediction Using Machine Learning on Flattened Time Series Data

Oct. 2023

Education

Rajamangala University of Technology Suvarnabhumi

2024

Faculty of Science and Technology, Major in **Data Science Management** | GPA 3.26

Pramaesakolsongkroh school

2020

Science-Mathematics

Skills

- **Programing language** : SQL, Python, Shell script(Unix), NoSQL, C#, PL/SQL
- **Tools** : Greenplum, Postgres, Hue, Cloudera Data Platform, Cloudera Impala, Apache Hive, Azure Databrick, Docker-Airflow, Oracle, MongoDB, Power BI (DAX)
